

CONTENTS

Pages

- 127 Modified two-grid method for solving coupled Navier-Stokes/Darcy model
based on Newton iteration
SHEN Yu-jing HAN Dan-fu SHAO Xin-ping
- 141 Distribution function estimates by Wasserstein metric and Bernstein
approximation for C^{-1} functions
WU Zong-min TIAN Zheng
- 151 The construction and approximation of feedforward neural network
with hyperbolic tangent function
CHEN Zhi-xiang CAO Fei-long
- 163 A new test on the conditional capital asset pricing model
LI Xia-fei CAI Zong-wu REN Yu
- 187 On the Markov-dependent risk model with tax
PENG Xing-chun WANG Wen-yuan HU Yi-jun
- 197 The maxima and sums of multivariate non-stationary Gaussian sequences
TAN Zhong-quan YANG Yang
- 210 Exponential martingale for compound Poisson process with latent variable
and its applications
YAN Jun
- 217 Functional sample path properties of subsequence's $C-R$ increments
for a Wiener process in Hölder norm
WEI Qi-cai
- 227 Robust construction of minimal surface from general initial mesh
YU Yang WU Qing-biao CHEN Min-hong Muhammad Suleman
- 245 A result on quasi k -connected graphs
YANG Ying-qiu
