

CONTENTS

Pages

- 253 Global existence and decay of solutions for the generalized bad Boussinesq equation
Hatice Taskesen Necat Polat Abdulkadir Ertaş
- 269 Geometric interpretation of several classical iterative methods for linear system of equations and diverse relaxation parameter of the SOR method
LU Xing-jiang LEI Lai-i
- 279 Maximum two-dimensional $(u \times v, 4, 1, 3)$ -OOCs
HUANG Yue-mei CHANG Yan-xun
- 290 A reaction-diffusion model with nonlinearity driven diffusion
MA Man-jun HU Jia-jia ZHANG Jun-jie TAO Ji-cheng
- 303 The coninvolutory decomposition and its computation for a complex matrix
CHEN Xiao-shan
- 311 The primitive matrices of sandwich semigroups of generalized circulant Boolean matrices
LIU Jian-ping CHEN Jin-song
- 321 European option pricing model in a stochastic and fuzzy environment
LIU Wen-qiong LI Sheng-hong
- 335 A_∞ weight estimates for vector-valued commutators of multilinear fractional integral
YU Xiao CHEN Jie-cheng ZHANG Yan-dan
- 358 Minimizing makespan in a two-stage hybrid flow shop scheduling problem with open shop in one stage
DONG Jian-ming HU Jue-liang CHEN Yong
- 369 Posterior propriety in nonparametric mixed effects model
XU An-cha TANG Yin-cai
