

CONTENTS

Pages

- 1 Approximation of conic section by quartic Bézier curve with endpoints continuity condition
LIU Yu XU Chen-dong
- 14 The classification of bi-quintic parametric polynomial minimal surfaces
LI Cai-yun ZHU Chun-gang
- 27 A sketch-based semantic retrieval approach for 3D CAD models
QIN Fei-wei GAO Shu-ming YANG Xiao-ling BAI Jing ZHAO Qu-hong
- 53 Determining knots by optimizing the bending and stretching energies
ZHANG Fan QIN Xue-ying LI Xue-mei CHENG Fu-hua
- 68 Solving two-dimensional Volterra-Fredholm integral equations of the second kind by using Bernstein polynomials
M. Sh. Dahaghin Sh. Eskandari
- 79 Asymptotic behavior of Mean-CVaR portfolio selection model under nonparametric framework
ZHAO Jun ZHANG Yi
- 93 Interest rate swap pricing with default risk under variance gamma process
YANG Xiao-feng YU Jin-ping
- 108 Traveling wavefronts for a reaction-diffusion-chemotaxis model with volume-filling effect
MA Man-jun LI Hui GAO Mei-yan TAO Ji-cheng HAN Ya-zhou
- 117 An accelerated augmented Lagrangian method for linearly constrained convex programming with the rate of convergence $O(1/k^2)$
KE Yi-fen MA Chang-feng
